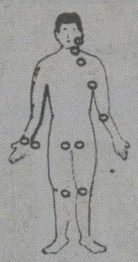
Basic Emergency First-Aid Procedures

Bleeding

1) Direct Pressure Method
Cover the wound with the cleanest cloth available and apply direct pressure over the wound. Elevate the arm or leg if there is no broken bone.
2) Pressure Point Method
(Use if direct pressure doesn't work). Continue direct pressure while you hold a pressure point closest to the wound and between the wound and heart. Hold tightly until bleeding stops. Use the points in the neck and head *only* as a last resort.
3) Internal Bleeding
Cold clammy skin, coughing blood, blood in stools or urine, weak and rapid pulse. Treat for shock. See SHOCK. Give nothing by mouth and get medical help.



Direct Pressure Method

Burns

Treatment for 2nd and 3rd Degree Burns
Cut away loose clothing that is not adhered to the skin. Cover with layers of moist, sterile dressings or immerse in cold water. Then treat for shock. Obtain medical attention.
General Burn Care
If medical help is not available within 1 hour and the conscious victim is not vomiting, you can give him ½ glass of a mixture of ½ tsp. salt and ½ tsp. baking soda in a quart of water, every 15 minutes. Do not break blisters or use ointments. Obtain medical help immediately.
Chemical Burns
Flood the burns with water for 20 minutes. Remove the victim's clothing which may have retained the chemical.

1st Degree Burn (Minor) Reddened Skin

2nd Degree Burn (Serious) Reddened Skin and Blisters

3rd Degree Burn (Very Serious) Skin Destroyed and charred

Exposure

Frostbite Symptoms
Victim's skin is a grayish yellow color, parts feel numb.
Frostbite Treatment
Wrap the victim in a dry cloth (wool is preferable). Do not rub or manipulate frozen parts. Bring the victim indoors and place in warm water (102°-106°). Do not use hot water bottles or heat lamps. If the feet are affected, do not let the victim walk. Once thawed, gently exercise the parts. For serious frostbite, call a doctor.
Heat Stroke
(Very Serious) Face is red and flushed with no perspiration. Lay the victim down and raise head and shoulders. Apply cold applications to the head and body. Use fans, air conditioning and ice to cool the body. Watch for signs of shock and get medical help.
Heat Exhaustion
(Less Serious) Treat as for shock, remove to a cool area, and avoid chilling.

Areas Commonly Affected By Frostbite

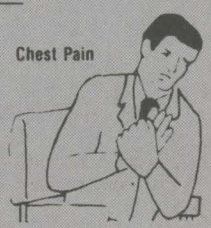
Ears

Fingertips

Toes Feet

Heart Attack

Symptoms
Shortness of breath, ashen color, anxiety. Crushing pain in chest, under breastbone, or down left arm. Possible sweating, vomiting or faintness.
Treatment
Place the victim in a semi-reclining or sitting position. Give artificial respiration if their breathing has stopped or oxygen if it is available. Loosen all tight clothing from the neck to waist. Do not allow the victim to move and do not give any stimulants. Comfort, reassure and keep the victim from getting chilled. *Call for medical help promptly.*



Chest Pain

Poisoning

Treatment
1) Remove all the residual poison from the mouth. Identify the poison, call for medical help and get instructions.
2) If unable to get instructions, have the victim drink water (*DO NOT give water to unconscious or convulsing patients).*
Children (under 5)–Drink 2 cups of water.
All Others–Drink 1 quart of water.
3) Induce vomiting EXCEPT WHEN:
A. The victim is unconscious or convulsing.
B. Corrosive or petroleum products have been swallowed.
4) Give water and continue vomiting.
How to Induce Vomiting
Place victim face down. Induce vomiting by tickling the back of the throat with finger.

Inducing Vomiting

Shock

Shock
Shock may accompany any serious injury, illness or blood loss. The symptoms are shallow breathing, nausea, collapse or clammy skin.
Treatment
Establish an open airway. Keep the victim lying down and control any bleeding. Elevate the victim's feet unless an injury would be aggravated.*
Place blankets over and under the victim but do not overheat. Do not give liquids and send for medical help immediately.
*(Exception—For a head & chest injury, heart attack or stroke, a semi-reclining position may be more comfortable if no spine injury exists).

FOR DIRECTORY ASSISTANCE CALLS To Distant Cities — Dial 1, Area Code if different from your own, then . . . **555-1212.**

long distance info

long distance dialing information

DIALING COSTS THE LEAST

When you dial long distance calls yourself and speak with anyone who answers, the rates are lower. One minute is the initial period.

To place a direct-dialed call. . .

If you are within the 501 area, dial

1 + phone number

If you are outside the 501 area, dial

1 + area code + phone number

CREDIT FOR POOR CONNECTIONS OR WRONG NUMBERS

When you have dialed a long distance phone call and have reached a wrong number, have had a poor connection or are cut off, hang up and dial **"0"** (Operator) immediately. This is so the operator can arrange for the proper credit after you have explained what had happened. The faster you report your problem, the easier it is to give you credit.

CALLING CARD (credit card) CALLS COST MORE

You can place long distance calls economically and have them charged to your telephone bill if you have a Calling Card (credit card). One minute is the initial period for a Calling Card call.

You may obtain a Calling Card from your Service Representative.

From Rotary Dial phones. . .

If you are within the 501 area, dial

0 + phone number

If you are outside the 501 area, dial

0 + area code + phone number

Tell your Operator that you are placing a Calling Card call and give your card number when he/she comes on the line.

From Touch-Tone* phones. . .

If you are within the 501 area, dial

0 + area code + phone number (wait for tone) **+ calling card number**

After you have dialed the number you want, then you will hear a special tone; key in your Calling Card number immediately.

OPERATOR-ASSISTED CALLS COST THE MOST

Calls that you dial yourself do not cost as much as those calls that require special handling. One minute is the minimum charge that applies at all times to places outside of Florida.

To place an Operator-assisted call. . .

If you are within the 501 area, dial

0 + phone number

If you are outside the 501 area, dial

0 + area code + phone number

TDD users call. . .

BREATHING

Choking

Anything stuck in the throat blocking the air passage can stop breathing and cause unconsciousness and death within 4 to 6 minutes.

1. **Do not interfere with a choking victim who can speak, cough or breathe. However, if the choking continues without lessening, call for emergency medical help.**
2. **If the victim cannot speak, cough or breathe, immediately have someone call for emergency medical help while you take the following action:**

A. FOR A CONSCIOUS VICTIM:

1. Stand just behind and to the side of the victim who can be standing or sitting. Support the victim with one hand on the chest. The victim's head should be lowered. Give 4 sharp blows between the shoulder blades. If unsuccessful —

2. Stand behind the victim, who can be standing or sitting, wrap your arms around his or her middle just above the navel. Clasp your hands together in a doubled fist and press in and up in quick thrusts. Repeat 4 times. If still unsuccessful — Repeat 4 back blows and 4 quick thrusts until the victim is no longer choking or becomes unconscious.

B. FOR AN UNCONSCIOUS VICTIM:

1. Place the victim on the floor or ground and give rescue breathing. (See Rescue Breathing section.) If the victim does not start breathing and if it appears that your air is not going into the victim's lungs —

2. Roll the victim onto his/her side, facing you, with the victim's chest against your knee and give 4 sharp blows between the shoulder blades. If the victim still does not start breathing —

3. Roll the victim onto his or her back and give one or more manual thrusts. To give the thrusts, place one of your hands on top of the other with the heel of the bottom hand in the middle of the abdomen, slightly above the navel and below the rib cage. Press into the victim's abdomen with a quick upward thrust. Do not press to either side. Repeat 4 times if needed. Even if successful —

4. Clear the airway.

A. Hold the victim's mouth open with one hand using your thumb to depress the tongue.

B. Make a hook with the pointer finger of your other hand, and in a gentle sweeping motion reach into the victim's throat and feel for a swallowed foreign object which may be blocking the air passage. Repeat until successful: (1) 4 back blows. (2) 4 abdominal thrusts (3) Probe in mouth. (4) Try to inflate lungs. Repeat.

NOTE: If the object has not been retrieved, but the swallower suddenly seems all right, play it safe . . . take him or her directly to the hospital. This is especially critical if the swallowed object is a fish bone, chicken bone or other jagged object that could do internal damage as it passes through the victim's system.

University of the Ozarks

CLARKSVILLE, ARKANSAS 72830

Founded as Cane Hill School at Cane Hill, Arkansas in 1834, the University of the Ozarks is within the boundries of the Synod of the Sun of the Presbyterian Church (U.S.A.)

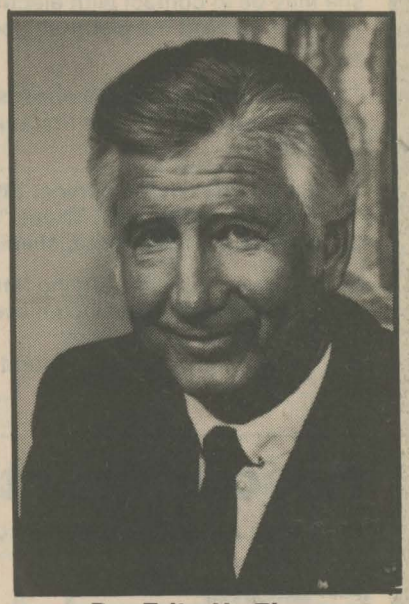
The university closed its doors as Cane Hill College in 1891, and the successor, Arkansas Cumberland College, to be located at Clarksville, Arkansas, was established by the Arkansas Synod of the Cumberland Presbyterian Church the same year. The Cumberland Presbyterian Church merged with the Presbyterian Church, U.S.A. in 1906. In 1920 the name of the University was changed to The College of the Ozarks and in 1987 changed to The University of the Ozarks. Notable progress was made under the distinguished leadership of President Wiley Lin Hurie between 1923 and 1949. In 1953 the school was endorsed as the institution of Higher learning of the Synod of Oklahoma-Arkansas of the United Presbyterian Church in the U.S.A.

In 1868, women were first admitted to Cane Hill College. Previously, women had attended the allied school, Cane Hill Female Seminary, which was established in 1840. Two women were graduated from Cane Hill College in 1872.

During World War II, the University of the Ozarks rendered conspicious service, first in training pilots under the National Civil Aeronautics Program and later as a naval training school in elementary electrical and radio material. During a period of fourteen months, primary training was given to more than three thousand men.

On January 1, 1960, the Board of National Missions of the United Presbyterian Church in the U.S.A. assumed ownership and operating responsibility of the University. Since 1973 Administrative responsibility and ownership has been invested in an elected Board of Trustees, with the continued spiritual and financial support of the Presbyterian Church U.S.A. and the Synod of the Sun.

The University is in Clarksville, Arkansas, county seat of Johnson County, a town of over 5,000 people. It is in the Arkansas River Valley, 65 miles east of Fort Smith, 105 miles west and north of Little Rock on I-40 and Highway 64. Continental Trailways Bus System serves this area.



Dr. Fritz H. Ehren
President University of the Ozarks

FACTS IN BRIEF

Location:
Clarksville, Arkansas
(Population 5,000)

Type of College:
Four Year, Private, Co-educational, Liberal Arts

Church Affiliation:
Presbyterian Church (U.S.A.)

Campus:
30 Acres, 12 Buildings

Adjunct Campus:
Extension Courses offered in Ft. Smith

Degrees Offered:
Bachelor of Arts
Bachelor of Science
Bachelor of General Studies
Associate of Applied Science

31 Major Areas
6 Preprofessional areas

Faculty:
35 Full-time
15 Part-time

Student/Faculty Ratio:
18 to 1

Student Body 1986-87
Enrollment—720
46% Men, 54% Women
70% from Arkansas
15% from other states
15% from foreign countries
85% receive financial assistance

ADMINISTRATION

President . . . . . Dr. Fritz H. Ehren
Dean of College . . . . . Dr. Waldo R. Widell
Business Manager . . . . Darrell W. Williams
Dir. of College Relations . . . Dean Van Riper
Dean of Students . . . . . Joe Hoins
Dir. of Admissions . . . . . Francis Pitts
Dir. of Alumni Affairs . . . . . Harold Hull
Coor. of Public Infor. . . . . Lisa Martin
Dir. of Financial Aid . . . . . Rex Anderson

BOARD OF TRUSTEES, January 1986
Helen R. Walton, Honorary Chair
Alvin C. Broyles, Chair
Jean C. Berry, Vice Chair
Joe M. Barron, Secretary

ACCREDITATION:
National Council for the Accreditation of Teacher Education, North Central Assoc. of Colleges and Secondary Schools, Ark. Dept. of Education.

The College awards degrees in the following areas of study:

Accounting
Art
Basic Mathematics
Biology
Business Administration
Business Education
Communications
Elementary Education
English
Entrepreneurship
General Science
Health Education
History
History/Sociology
Management
Marketing

BREATHING

Unconscious Person

Breathing is the most critical thing we must do to stay alive. A primary cause of death is lack of air!

Be careful approaching an unconscious person. He or she may be in contact with electrical current. If that is the case, turn off the electricity before you touch the victim.

There are hundreds of other possible causes of unconsciousness, but the first thing you must check for is breathing.

1. **Try to awaken the person: Shake the victim's shoulder vigorously. Shout: "Are you all right?"**
2. **If there is no response, check for signs of breathing.**

A. Be sure the victim is lying flat on his or her back. If you have to roll the victim over, move his or her entire body at one time.
B. Loosen tight clothing around the neck and chest.

3. **Open the airway:**

A. If there are no signs of head or neck injuries, tilt the neck gently with one hand.
B. Push down and back on the forehead with the other hand, as you tip the head back.
C. Place your ear close to the victim's mouth. Listen for breath sounds. Watch his or her chest and stomach for movement. Check for at least five seconds.
D. If there is any question in your mind, or if breathing is so faint that you are unsure . . . assume the worst!
E. Give rescue breathing immediately. Have someone else summon professional help.

Rescue Breathing

1. **Giving mouth-to-mouth rescue breathing to an adult.**

A. Put your hand on the victim's forehead, pinching the nose shut with your fingers, while holding the forehead back.
B. Your other hand is under the victim's neck supporting and lifting up slightly to maintain an open airway.
C. Take a deep breath. Open your mouth wide. Place it over the victim's mouth. Blow air into the victim until you see his or her chest rise.

D. Remove your mouth from the victim's. Turn your head to the side and watch the chest for a falling movement while you listen for air escaping from the victim's mouth as he or she exhales.
E. If you hear air escaping and see the chest fall you know that rescue breathing is working. Continue until help arrives or the person resumes normal breathing.
F. Repeat the cycle every 5 seconds. 12 breaths per minute.

2. **Giving mouth-to-mouth rescue breathing to infants and small children.**

A. Be careful tilting a small child's head back to clear the airway. It should not be tilted as far back as an adult's. If tilted back too far, it will make the obstruction worse.
B. Cover the child's mouth and nose with your mouth.
C. Blow air in with less pressure than for an adult. Give small puffs. A child needs less.
D. Feel the chest inflate as you blow.
E. Listen for exhales.
F. Repeat once every 3 seconds. 20 breaths per minute.

NOTE: It may take several hours to revive someone. Keep up rescue breathing until help arrives to relieve you. Remember you are doing the breathing for the victim. If you stop — in about 4 to 6 minutes — he or she could be dead! Even if the victim begins to breathe on his/her own, call for professional help.

DAVIS CHIROPRACTIC

Our Insurance Policy

If you have qualifying health insurance that covers chiropractic care and if you are accepted as a patient... we will accept whatever your plan pays as payment in full! You don't even have to pay your deductible or co-payment (up to $100.00 deductible & 20% co-payment) because we are willing to assume them. This means treatment at Davis Chiropractic Office won't cost you anything out of your pocket.

Our insurance administrator will be happy to assist you in finding out your coverage.

968-7890

FREE SPINAL EXAMINATION

Danger Signals of Pinched Nerves:

1. Frequent Headaches
2. Low Back or Hip Pain
3. Dizziness or Loss of Sleep
4. Numbness in Hands or Feet
5. Nervousness
6. Neck Pain or Stiffness
7. Arm and Shoulder Pain

*Free preliminary examination does not include X-rays or treatment.

People start pollution.

Kids, cops, comptrollers.
Butchers, bakers, businessmen.
Mommies, models, mayors.
Violinists, vice presidents,
workmen, waiters.

People can stop it.

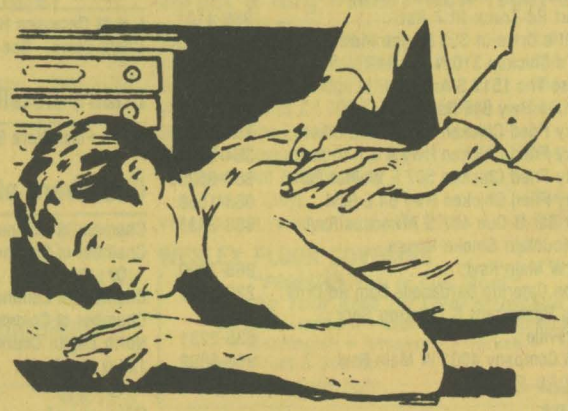
DAVIS CHIROPRACTIC



Our Insurance Policy

If you have qualifying health insurance that covers chiropractic care and if you are accepted as a patient... we will accept whatever your plan pays as payment in full! You don't even have to pay your deductible or co-payment (up to $100.00 deductible & 20% co-payment) because we are willing to assume them. This means treatment at Davis Chiropractic Office won't cost you anything out of your pocket.

Our insurance administrator will be happy to assist you in finding out your coverage.

EVERY SIXTY SECONDS ANOTHER AMERICAN IS DIAGNOSED A DIABETIC

WARNING SIGNALS OF DIABETES

Juvenile-onset diabetes is characterized by the sudden appearance of:

Constant urination
Abnormal thirst
Unusual hunger
The rapid loss of weight
Irritability
Obvious weakness and fatigue
Nausea and vomiting

Any one of the signals can mean diabetes. Children usually exhibit dramatic and sudden symptoms and must receive prompt medical treatment.

Adult-onset diabetes may include any of the signs of juvenile diabetes or:

Drowsiness
Itching
A family history of diabetes
Blurred vision
Excessive weight
Tingling, numbness in feet
Easy fatigue
Skin infections and slow healing

Many adults may have diabetes with none of these symptoms. The disease is often discovered during routine physical examinations.

IF YOU CAN GIVE HELP, OR NEED HELP, CONTACT YOUR LOCAL ADA AFFILIATE.

Why FREE? Thousands of area residents have spine related problems which usually respond to chiropractic care.
This is our way of encouraging you to find out if you have a problem that could be helped by chiropractic care. It is also our way of acquainting you with our staff and facilities.
Examination includes a minimum of 10 standard tests for evaluating the spine and a contour analysis photo as shown above.
While we are accepting new patients, no one need feel any obligation. CM

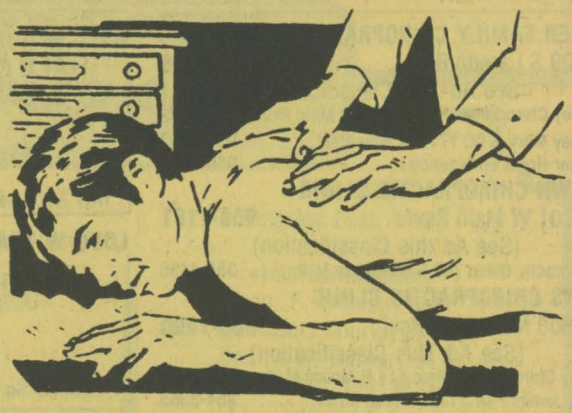
DAVIS CHIROPRACTIC



Our Insurance Policy

If you have qualifying health insurance that covers chiropractic care and if you are accepted as a patient... we will accept whatever your plan pays as payment in full! You don't even have to pay your deductible or co-payment (up to $100.00 deductible & 20% co-payment) because we are willing to assume them. This means treatment at Davis Chiropractic Office won't cost you anything out of your pocket.

Our insurance administrator will be happy to assist you in finding out your coverage.

968-7890

FREE SPINAL EXAMINATION

Danger Signals of Pinched Nerves:

1. Frequent Headaches
2. Low Back or Hip Pain
3. Dizziness or Loss of Sleep
4. Numbness in Hands or Feet
5. Nervousness

ARKANSAS VALLEY BONE & JOINT CLINIC

Orthopaedics is the practice of straightening or correcting skeletal abnormalities whether they are caused by nature or by man. The word Orthopaedic comes to us from the Greek; meaning freely translated, to straighten the crippled child.

People start pollution.

Kids, cops, comptrollers. Butchers, bakers, businessmen. Mommies, models, mayors. Violinists, vice presidents, workmen, waiters.

People can stop it.

Keep America Beautiful

Orthopedic Surgery

ARKANSAS VALLEY BONE & JOINT CLINIC

Orthopaedics is the practice of straightening or correcting skeletal abnormalities whether they are caused by nature or by man. The word Orthopaedic comes to us from the Greek; meaning freely translated, to straighten the crippled child.

ARKANSAS VALLEY BONE & JOINT CLINIC

Orthopaedics is the practice of straightening or correcting skeletal abnormalities whether they are caused by nature or by man. The word Orthopaedic comes to us from the Greek; meaning freely translated, to straighten the crippled child.

A CONSUMER TIP

About Warranties:

Don't wait until a product or service fails or needs repair to find out about the warranty. Become familiar with the terms of the warranty before you buy. Consider these points:

- What is covered by the warranty? The entire product? Only certain parts? Is labor included?
- How long does the warranty last on the entire product or service? On parts and assemblies?
- Who do you call when repairs are needed? The manufacturer? The dealer? A service agency?
- Is the repair service conveniently located? Who pays for shipping?

You're First With Us!

Be careful with fire:
There are babes
in the woods.

And those baby animals and trees need a place where they can grow up strong and healthy. The forest is their home. When you come to visit, please don't burn it down.
